What's blooming?

Azaleas, Camellias, Rhapsiolepis, Bird of Paradise, Some roses (unpruned), Flowering Magnolia, Evergreen Pear, Statis, Euryopsis, Pansy, Snapdragons, and Stock

PROBLEM OF THE MONTH

It is that time of the year where you see all kinds of unwanted weeds, growing where you don't want them to.

Some of the weeds you may find in bare areas would be annual grasses, Mustard, Cheeseweed, Milkweed, Ketchupweed and Mayonaise-weed.

Just kidding about the last two of course.

Some common weeds you might find in your turf would be. Dandelions, Oxalis, White clover, Chickweed,

(don't get excited guys), not that kind of chick, babe or as we so commonly refer them now that we are gentlemen, as ladies. However there is a plant with the common name of naked lady that has

Weather

Good morning ladies and gentlemen of So Cal ! This Jan, Feb, 2007 have been the coldest in a decade The most important item of the month is: Do not cut your frosted plants back until they start to show signs of new growth. Then we will trim the dead parts off and wait for new growth to fill in. I am sorry for the delay, we just want your plant material to look as good as possible as soon as possible without doing further damaged by pruning them back this week. As you probably know freezing temperatures are still possible in some micro climate areas. The temperature this morning at my home in Riverside was 39 degrees (2/28/07).

Plants that were affected by the frost:

Bougainvillea, Cuphea, Gazania Lantana, Giant Birds of Paradise, Carrotwood trees, Tristania trees, and Ficus nitada trees.

Tree of the Month:

Employee of the Month:

Fernando Milan

Fernando Milan has been with our company for 11 years, and we consider him to be one of our partners. He handles all of the maintenance crews. He has done a better job at this than either Greg or myself were able to do. He a great motivator to the crews and his eye for detail is why your job sites are always looking there best. He helps run the safety meetings and is highly involved with tree trimming on a supervisory basis. How one man can do so much is amazing to me
